

## Program (final)

(The hours are in CET or GTM +2)

| Day 1: Wednesday, Oct 29, 2025 |                                                                                                                                                                                                               |                      |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| 08:15                          | (1) Welcome   The 4 surgical key-factors for successful outcomes with long-term stability   The new 4th generation Straumann implant for the Esthetic Zone: The hybrid TLC Implant – Surgical characteristics | D. Buser             |
| 09:00                          | (2) Implant placement post extraction: when immediate, when early, when socket grafting and delayed?                                                                                                          | D. Buser             |
| 09:45                          | (3) Esthetic principles in implant dentistry – The new 4th generation Straumann implant for the Esthetic Zone: The hybrid TLC Implant – Prosthetic characteristics                                            | M. Fonseca           |
| <b>10:30</b>                   | <b>Coffee break</b>                                                                                                                                                                                           |                      |
| 10:45                          | Live surgery I: Implant placement in a healed – Flapless & computer-assisted (CAIS)                                                                                                                           | D. Buser/M. Fonseca  |
| 12:00                          | (4) Guest Lecture #1: Socket Grafting for Alveolar Ridge Preservation: When and how? <b>Lecture via ZOOM</b> from Zurich/SUI                                                                                  | R. Jung              |
| 13:00                          | Discussion with R. Jung                                                                                                                                                                                       | Mod: D. Buser        |
| <b>13:15</b>                   | <b>Lunch</b>                                                                                                                                                                                                  |                      |
| 14:00                          | Live Surgery II: Early Implant placement post extraction with GBR                                                                                                                                             | D. Buser/ M. Fonseca |
| <b>15:15</b>                   | <b>Coffee break</b>                                                                                                                                                                                           |                      |
| 15:30                          | (5) Treatment planning in implant patients: How much digital technology is used today?                                                                                                                        | M. Fonseca           |
| 16:15                          | Panel Discussion with all on-site speakers                                                                                                                                                                    |                      |
| 16:45                          | <b>Hands-on workshop 2: Implant Prosthetics</b>                                                                                                                                                               | R. Buser             |

| Day 2: Thursday, Oct 30, 2025 |                                                                                                                                               |                       |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| 08:00                         | (6) Bone healing in membrane protected defects: Which bone grafts, bone substitutes and barrier membranes should we use?                      | D. Bosshardt          |
| 08:45                         | Live Surgery III: Extraction 22 and immediate implant placement: Flapless approach, computer-assisted implant surgery (CAIS)                  | D. Buser & A. Weber   |
| 10:00                         | <b>Coffee break</b>                                                                                                                           |                       |
| 10:15                         | (7) <i>The power of autogenous bone chips &amp; the Concept of Bone-Conditioned Medium</i>                                                    | J. Caballé            |
| 11:00                         | (8) Guest Lecture #2: <i>Immediate Implant Placement</i> with immediate restoration: When and how? <b>Lecture via ZOOM</b> from Melbourne/AUS | S. Chen               |
| 12:00                         | Discussion with Stephen Chen                                                                                                                  | D. Buser              |
| 12:15                         | (9) The concept of <i>Early Implant Placement</i> with simultaneous GBR: When and how?                                                        | D. Buser              |
| 13:00                         | <b>Lunch</b>                                                                                                                                  |                       |
| 13:30                         | (10) Soft tissue conditioning around osseointegrated implants                                                                                 | M. Fonseca            |
| 14:00                         | Live Surgery #IV: Late implant placement 21 with GBR and the sausage technique                                                                | D. Buser & J. Caballé |
| 15:15                         | (11) Guest Lecture #3: The interaction between prosthodontist and dental technician in the digital era                                        | I. Sailer & V. Fehmer |
| 16:30                         | Panel Discussion with all on-site speakers                                                                                                    |                       |
| 16:45                         | <b>Hands-on Workshop 2: Implant Surgery</b>                                                                                                   | J. Caballe & D. Buser |
| 18:00                         | Social Event by attending a handball Switzerland vs. Croatia                                                                                  |                       |

| Day 3: Friday, Oct 31, 2025 |                                                                                                                                                    |                          |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| 08:15                       | <b>Hands-on workshop 3: Digital planning</b>                                                                                                       | M. Fonseca & G. Sabatini |
| 09:45                       | <b>Coffee break</b>                                                                                                                                |                          |
| 10:00                       | (12) Prosthetic procedures for esthetic single-tooth crowns                                                                                        | M. Fonseca               |
| 10:45                       | (13) GBR procedures in complex situations                                                                                                          | D. Buser                 |
| 11:30                       | (14) Prosthetic procedures for implant borne FPD in implant patients                                                                               | M. Fonseca               |
| 12:15                       | <b>Lunch</b>                                                                                                                                       |                          |
| 13:00                       | <b>Group Photo</b> (only on-site participants & on-site speakers)                                                                                  |                          |
| 13:15                       | (15) Treatment concepts for elderly patients in the esthetic zone                                                                                  | D. Buser & R. Buser      |
| 14:00                       | (16) Long-term results with implant borne restorations in the esthetic zone: What factors are relevant?                                            | U. Belser                |
| 15:00                       | (17) Mucosal recessions at implants: Potential of soft tissue grafting?                                                                            | A. Sculean               |
| 16:00                       | (18) Guest Lecture #4: The handling of vertical hard and soft tissue defects in the anterior maxilla. <b>Lecture via ZOOM</b> from Los Angeles/USA | S. Jovanovic             |
| 17:00                       | Panel Discussion with all speakers of Friday                                                                                                       |                          |
| 17:15                       | <b>End of the Esthetic Master Course 2025</b>                                                                                                      |                          |

## Faculty

### Course Directors:

**Prof. em. Dr. Daniel Buser**, Prof. emeritus, School of Dental Medicine, University of Bern | Center for Implantology Buser & Frei, Bern-Bümpliz, Switzerland  
e-mail: [daniel.buser@unibe.ch](mailto:daniel.buser@unibe.ch)

**Dr. Manrique Fonseca**, Senior Prosthodontist, Dept. of Reconstructive Dentistry and Gerodontology, School of Dental Medicine, University of Bern, Bern, Switzerland  
e-mail: [manrique.fonseca@unibe.ch](mailto:manrique.fonseca@unibe.ch)

### Guest Speakers:

**Prof. em. Dr. Urs Belser**, Prof. emeritus, School of Dental Medicine, University of Geneva, Switzerland  
e-mail: [urs.belser@unige.ch](mailto:urs.belser@unige.ch)

**Dr. Stephen Chen**, Associate Professor, Dept. of Periodontics, Melbourne Dental School, The University of Melbourne, Australia  
e-mail: [schen@periomelbourne.com.au](mailto:schen@periomelbourne.com.au)

**Dr. Sascha Jovanovic**, Academic Chairman, glDE Institute, Los Angeles CA, USA  
e-mail: [sascha@gidedental.com](mailto:sascha@gidedental.com)

**Prof. Dr. Ronald E. Jung**, Professor and Chairman, Clinic of Reconstructive Dentistry, Center of Dental Medicine, University of Zürich, Zürich, Switzerland  
e-mail: [ronald.jung@zzm.uzh.ch](mailto:ronald.jung@zzm.uzh.ch)

**Prof. Dr. Irena Sailer**, Professor and Chair, Division of Fixed Prosthodontics and Biomaterials, University Clinics for Dental Medicine, University of Geneva, Geneva, Switzerland.  
e-mail: [irena.sailer@unige.ch](mailto:irena.sailer@unige.ch)

**Vincent Fehmer**, MDT, Division of Fixed Prosthodontics and Biomaterials, University Clinics for Dental Medicine, University of Geneva, Geneva, Switzerland.  
e-mail: [vincent.fehmer@unige.ch](mailto:vincent.fehmer@unige.ch)

### Speakers of the University of Bern:

**Dr. Ramona Buser**, Senior Prosthodontist, Dept. of Reconstructive Dentistry and Gerodontology, School of Dental Medicine, University of Bern, Bern, Switzerland  
e-mail: [ramona.buser@unibe.ch](mailto:ramona.buser@unibe.ch)

**Prof. Dr. Jordi Caballé Serrano**, Associate Researcher, Department of Periodontology, University of Bern, Bern, Switzerland | Associate Professor, Department of Oral and Maxillofacial Surgery, Universitat Internacional de Catalunya (UIC), Barcelona, Spain  
e-mail: [jordicase@uic.es](mailto:jordicase@uic.es)

**Prof. Dr. Anton Sculean**, Professor and Chairman, Dept. of Periodontology, School of Dental Medicine, University of Bern, Bern, Switzerland  
e-mail: [anton.sculean@unibe.ch](mailto:anton.sculean@unibe.ch)
